

# THE GENVAULT DISPATCH

Quarterly Newsletter

## COMPANY UPDATE

**GenVault Transport Services** is excited to introduce a refreshed brand look, including a new logo and updated website. The new design offers a clean, modern look that aligns with our capabilities and the high standards our clients expect. While our appearance has evolved, our core values remain unchanged—professionalism, reliability, and commitment to service excellence continue to guide everything we do.

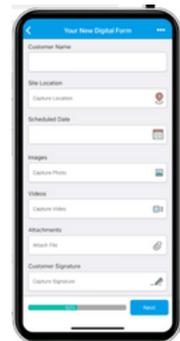

## GOING GREEN

We're excited to announce that we've upgraded our dispatching and Bill of Lading (BOL) workflows to a **digital platform**.

What does this mean to our customers?

- **Faster Service** – BOLs are now completed in the field and automatically emailed to our customers as a PDF, speeding up communication and documentation.
- **Improved Accuracy** – With locked fields and required formats, our forms ensure every submission meets our standard operating procedures.
- **Better Visibility** – Real-time tracking, photo documentation, and timestamped records enhance accountability and transparency.
- **Audit Trail & Compliance Support** – All submissions are securely stored in the cloud, making them easily retrievable for audits, claims, or customer records.

This change eliminates the delays and risks associated with relying on paper forms, enabling us to serve you more efficiently, accurately, and sustainably. We are proud to take this step toward a greener, more efficient future.

**MOVING YOUR LAB?** Understanding the various phases of a lab relocation is crucial for ensuring a safe, efficient, and compliant move, which requires careful planning and coordination. Get ahead of the challenges of a lab move with a roadmap that provides insight into each step, helping internal teams avoid common pitfalls and stay on track. From evaluating a reliable lab move vendor and cold storage requirements to regulatory compliance, this infographic breaks down the phases, enabling lab personnel to avoid delays, minimize downtime, and safeguard valuable research and materials.

Every lab move is unique, and the final details of each phase should be carefully planned with an experienced lab move provider.

## MEET BRAD MURPHY

Meet Brad Murphy, our newest Sales Representative at GenVault Transport Services. With over 22 years of experience in the moving and storage industry, Brad brings a wealth of knowledge, professionalism, and a strong network of relationships to the GTS team. His focus will be on expanding our market presence and strengthening customer partnerships.

When he's not helping clients solve complex relocation challenges, Brad enjoys cooking, exploring the world of cryptocurrency, and expanding his ever-growing shoe collection—he admits he's a victim of social media brand marketing! His favorite sports teams are the University of Alabama. Go, "Roll Tide."
