

THE GENVAULT DISPATCH

Quarterly Newsletter

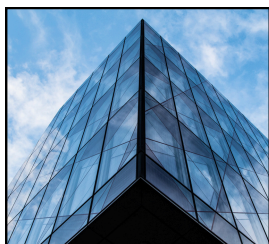

Welcome to the first edition of the **GenVault Dispatch**, our new quarterly newsletter to keep you informed on the latest company updates, expert tips on lab relocation, real-world case studies, articles, and industry insight.

LAB RELOCATION SERVICES

GenVault Transport Services specializes in the safe, efficient, and **at-temperature relocation** of laboratory equipment and critical biological materials. From ultra-low freezers and cryogenic storage to temperature-sensitive biospecimens, we handle every move with precision and care — so you can focus on your research while we take care of the logistics.

CASE STUDY: CROSS-COUNTRY LAB RELOCATION

GenVault Transport Services successfully relocated a research lab, household goods, and vehicles nationwide, ensuring at-temperature transport and minimal disruption.

LEARN MORE

GENVAULT IS ISO 9001:2015 CERTIFIED

GenVault Transport Services (GTS) is ISO 9001:2015 certified, meeting the globally recognized standard for Quality Management Systems (QMS). This certification reflects our commitment to high-quality service, standardized processes, and continuous improvement in all transport operations.

What this means for our clients:

- ✓ **Reliable & Consistent Service**
Adherence to strict quality standards
- ✓ **Quality Assurance**
Every move follows proven, standardized procedures
- ✓ **Continuous Improvement**
Ongoing enhancements to meet industry demands

ARE YOU EXPERIENCING A MERGER OR ACQUISITION?

Mergers and acquisitions create exciting opportunities, but integrating two labs into one can also present operational and logistical challenges. Handling the complexities of a lab relocation requires expertise and careful planning.

GenVault Transport Services specializes in lab relocations, maintaining controlled-temperature environments, and ensuring the integrity of research and clinical biological materials, lab chemicals, and other critical assets.

Whether moving cryogenic, refrigerated, or ultra-low temperatures, our experienced technicians mitigate risks, maintain regulatory compliance, and minimize downtime. Do not let the complexities of a lab move interrupt research or operations—hire a professional lab mover to execute it safely and efficiently.

Reminder: Secure Your Q2 Lab Move
