

REDEFINING THE BIOREPOSITORY EXPERIENCE

BUILT TO SAFEGUARD

- Engineered to uphold the highest levels of safety and withstand natural disasters
- VESDA detection with superior FM-200 dry suppression system, back-up generators and tertiary back-up power system
- ISO 9001 Certified, ISO 20387 Accredited, CAP Accredited, FDA registered, and 21 CFR part 11 compliant, GxP compliant facility

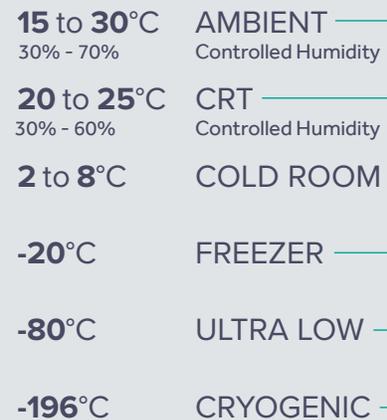

POWERED BY PARTNERSHIP

- Dedicated expert team to support you with care and attention you won't find everywhere
- Fast turnaround time to minimize backlog and delays with GenVault's fleet of climate-controlled GPS vehicles
- Transparent pricing keeps your budget under control

EFFICIENT BY DESIGN

- Five-floor design delivers 5x the capacity per square foot, increasing savings
- Plug-and-play electrical system for various capabilities and temperature controls on each floor, boosting operational efficiency
- Over 500,000 sq.ft. of flexible storage for all freezer types and temperature ranges—pre-validated and ready with a 14-day turnaround on requests

FROM AMBIENT TO CRYOGENIC

GxP-COMPLIANT FACILITY

PRESERVATION

Critical asset storage and inventory management from ambient/CRT to ultra-low and cryogenic temperatures.

STABILITY

Controlled environment stability chamber for temperature, humidity, and light conditions for a variety of industries.

TRANSPORTATION

GenVault Transportation Services (GTS) provides temperature-controlled shipping with compliant monitoring throughout the chain-of-custody.
